

Chronic Dyspepsia Cured.

AFTER suffering for nearly thirty years from dyspepsia, Mrs. E. E. Dugdale, wife of a prominent business man of Warsaw, N. Y., writes: "For 23 years, I was a constant sufferer from dyspepsia and a weak stomach. The lightest food produced distress, causing severe pain and the formation of gas. No matter how careful of my diet I suffered agonizing pain after eating. I was treated by many physicians and tried numerous remedies without permanent help. Two years ago I began taking Dr. Miles' Nervine and Liver Pills and Nervine. Within a week I commenced improving, and persisting in the treatment I was soon able to eat what I liked, with no evil effects. I keep them at hand and a single dose dispels any old symptoms."

NOW AT SEA

Navy Department Receives No Dispatches From the Fleets.

A DECISIVE BATTLE

Expected Before Any Word Comes From Sampson.

FLYING ENEMY'S FLAG

Spain's Protest to Powers Gives Naval Officers No Concern.

ARE SUBJECT TO SEIZURE

All Spanish Vessels In United States Ports.

Does Likely to Resort to Privateering According to Their Minister of Interior. The First Manila Expedition Almost Complete—Two More Vessels Will Take on Troops Today—Second Expedition Will Await the Arrival of General Merritt—Other War News.

Washington, May 24.—It was stated at the navy department last night that no dispatches of any kind relating to the movements of the fleets or the prospect of an engagement had been received during the day, and that the only dispatch received related to an inconsequential prize case. As the ships are now at sea there is no expectation of reports until a decisive engagement occurs and a dispatchboat gets to a port, or it is found Cervera has eluded our search. In the meantime, there is a complete lack of official data by which to forecast the coming engagement.

A report was current during the day that the big battleship Oregon had arrived at Key West, but the department officials would notice it only by entering a general denial that word had been received of any important vessel movements or arrivals.

Flying Enemy's Flag.

Dispatches from Madrid giving the sharp debate in the Cortes over the alleged flying of the Spanish flag by American warships created much comment in naval circles. Spain's protest to the powers that this use of the flag was "cowardly and intemperate," was dismissed by naval officers with the statement that international law writers agreed on the right to use an enemy's flag for purposes of deceit, so long as the flag is hoisted down before a shot is fired. The United States naval regulations make specific provision on this point. The navy department repeatedly issued an edition of Snow's Precedence, a standard work on naval usage in the time of peace and war. In this, the doctrine on the use of an enemy's flag is stated as follows:

"The regulations of the United States navy state that the use of a foreign flag to deceive an enemy is permissible, but that it must be hoisted down before a shot is fired, and under no circumstances is an action to be commenced or an engagement fought without the display of the national ensign."

The foregoing rule, both by regulation and by the text book distributed to the navy is a guide for all naval officers. Practically the same rule is applied to the use of an enemy's uniform.

Likely to Resort to Privateering. The statement made by the Spanish minister of interior that the government is likely to resort to privateering, does not cause any apprehension among officials here. One of the highest authorities of the navy department said Spain would adopt privateering if she felt it to be to her interest, without waiting for such action. It is felt, however, that Great Britain, Germany and France will have considerable to say in case Spain resorts to privateering. The commerce of these countries with the United States would suffer very severely by Spanish privateering, and its effect would be far more disastrous to these foreign interests than to the shipping of the United States. It was this influence of Great Britain, Germany and France which forced Spain reluctantly to forego privateering, and it is not thought probable these foreign influences will now consent to have their commerce destroyed.

With the beginning of the present week all Spanish vessels in United States ports, which sailed after the outbreak of war, are subject to seizure as well as all Spanish merchantmen found in the high seas, save where they left port for the United States before April 21st last. The president's proclamation of war allowed such ships lying in our ports or bound for them 30 days in which to discharge cargo and also insured them safe passage home. That period of time expired last Saturday night. This, it is expected, will tend to free the state department from complications.

Signal Service System.

Captain Bartlett has just perfected a most admirable and thorough system of coast signaling for war purposes. The navy department has established 30 stations on the coast, manned by naval militiamen. It has called into service 1,000 lighthouse employees and 1,000 life-saving men, making a total force of over 3,000 men who patrol the great shoreline from Bar Harbor to Galveston night and day, and in all weathers, watching for the approach of an enemy or for a signal from any passing United States warship.

It has been arranged that all of these watchers can communicate in the course of a few minutes with a telegraph or telephone line and all center in the office of Captain Bartlett in the navy department, who is thus prepared to give the war board instant notice of any significant ship movements on the coast.

It is said at the navy department that it will be at least five days before the Monterey can be started on her long journey from San Francisco, for Manila, the delay being on account of the preparations that must be made for the very exceptional service required of the vessel.

MANILA EXPEDITION.

Preparation for the First One Almost Complete.

San Francisco, May 24.—The preparations for the first expedition to Manila are almost complete. The first expedition will be divided as follows:

The City of Peking, the first California volunteers, composed of 49 officers and 953 enlisted men, 10 officers and 71 sailors of the navy, making a total of 59 officers and 1,044 men.

The City of Sydney, 13 officers and 318 enlisted men of the Oregon volunteers; 9 officers and 300 men of the first companies of the Fourteenth United States infantry, one officer and 50 men of the California heavy artillery and Dr. H. E. McVain, ranking medical officer, making a total of 24 officers and 670 men.

The Australia, the headquarters, staff and band and two battalions of Oregon volunteers, comprising 37 officers and 676 men.

The troops assigned to depart on the Australia and the City of Sydney have been ordered to report at the docks of their respective vessels today. The organization of the second expedition to the Philippines will not be determined until after the arrival of General Wesley Merritt, who is in command of the whole expedition and who will reach this city at the end of the week.

The steamer Zelandia is due to arrive here from Honolulu today. The work of unloading her cargo will be rushed and the vessel will probably be turned over to the government Thursday night and the work of transforming her into a troop ship will commence immediately. The steamer China is expected to arrive from the Orient on Saturday. She will be ready for use as a transport by the end of the following week. About eight more large steamers will be required to transport the necessary soldiers to Manila.

Difficulty In Securing Transports. Washington, May 24.—Much comment and some criticism has been caused by the delay in forwarding troops to the Philippine islands to support Admiral Dewey. Both the comment and the criticism had their origin in the desire of the people that the fruits of Dewey's brilliant victory at Manila should not be endangered by any lack of assistance from either the navy or war departments. Troops would have been sent to Manila before this had it been possible to secure transportation on the Pacific coast. The utmost difficulty is being experienced in obtaining transports.

Castro's Statements Denied. New York, May 24.—The statements attributed to Senor Leon Y. Castillo, cable from Paris and published here, to the effect that negotiations were pending between the Spanish ambassador at Paris and Senor Betances, the representatives of the Cuban Republic government for the purpose of submission of Cuban insurgents is strenuously denied at the offices of the Cuban junta in this city.

Clearance Will Not Be Granted. Washington, May 24.—Secretary Gage has issued an order to custom officers, notifying them that the port of Manila, Philippine islands is blockaded by the United States fleet under Admiral Dewey and therefore clearance will not be granted to merchant vessels for that port.

Buying Horses For Cavalry. Lexington, Ky., May 24.—For the cavalry, horses by the hundreds are being purchased in Kentucky and transported to Chattanooga and Tampa. Two parties of buyers, headed by Captains Aelshire and Carson, have been in Central Kentucky for a week past, and their purchases represent about 500 head of geldings.

General Merritt and Staff. Chicago, May 24.—General Merritt left for the Pacific coast last night on a special car attached to the Omaha train of the Chicago and Northwestern railroad. He steadily refused to be interviewed and the members of his staff maintained the same reticence.

Senator Foraker's Father. Hillsboro, O., May 24.—Henry S. Foraker, father of Senator J. B. Foraker of Ohio, died here yesterday aged 83.

Railroad Men Slashed. Bellefontaine, O., May 24.—C. H. Potter, W. D. Quigley and Floyd Crandall, all firemen on the Indianapolis division of the Big Four, were badly cut by three colored men. The negroes who used their razors with such telling effect escaped. The railroad men had attempted to slay a one-armed man from the ruffians when assaulted.

Went to Sleep on the Track. Shelbyville, Ky., May 24.—Richard Sheehan, a well known farmer, was run down and killed by a Southern railway train near Hemp Ridge station, eight miles east of this place. It is presumed he went to sleep on the track.

HEAVY CANNONADING

Port de Piax Dispatches Report It Off North Cuba.

IMPORTANT CUBAN NEWS

Believed to Have Been Received at Madrid.

Vatican Said to Have Received Word From Washington Regarding Sympathy With Spain—Another Cabinet Crisis Believed to Be Near—Minister of Finance Refuses to Adopt Income Tax—Troops Leaving Cadiz.

Port au Prince, Hayti, May 24.—The following dispatch has been received from Port de Paix, dated Saturday last, land telegraphic communication having been interrupted up to last evening: "A furious cannonading was heard on the 10th (Thursday last) in the direction of the north of Cuba. Today (Saturday), the cannonading continues in a very lively fashion."

(Port de Paix is in the northwestern part of Hayti and the firing referred to may have been from any part of the eastern extremity of Cuba. As the Spaniards claim Guantanamo was recently bombarded by American warships, the sound of firing may have come from that direction.)

IMPORTANT NEWS FROM CUBA.

But the Government Fails to Make It Public.

Madrid, May 24.—The belief is prevalent in all circles and in all sections of the press that the government is in possession of important news from Cuba. Its character has not been made public. The report that Great Britain had sent a note to Spain asking an explanation of the concentration of troops in the neighborhood of Gibraltar is officially denied.

GOT A POINTER.

Report that the Vatican Received Notice From Washington.

London, May 24.—The Rome correspondent of The Chronicle says he learns that the Vatican's declaration of neutrality was due to a notification from Washington that no manifestations of sympathy with Spain would be tolerated.

The Madrid correspondent of The Daily Mail says: "It is safe to predict another cabinet crisis. Senor Paigever, minister of finance, who in the cortes has absolutely declined to adopt an income tax, being expected to resign soon."

A dispatch to The Daily Chronicle from Barcelona says: "A steamer took 1,000 soldiers from Cadiz Saturday for the Canaries or the Philippines, and there are two transatlantic liners now in port here."

The Daily Chronicle commenting on a despatch from its correspondent at Kingston, Jamaica, who says that England has thrown 18 months' supplies into Jamaica, where all the officers have had their leave withdrawn, asks if England is going to take a hand in the Hispano-American war and couples its correspondent's report with the rumor current in Liverpool yesterday that France is trying to buy the Canaries for 6,000,000 pounds (\$30,000,000).

CRUISER FOR PATROL DUTY.

British Officer Urges the Necessity of One Off Newfoundland Coast.

St. John, N. E., May 24.—An officer from one of the British warships on the west coast of this island arrived here last night to consult with the governor, Sir Herbert Murray, as to the contingency of the arrival of the Spanish fleet in these waters to obtain coal. The officer desires that his name should not be mentioned, but he urges Sir Herbert Murray to advise the American government to send one of its fastest cruisers to patrol the Grand Banks for a week or more, that the cruiser, on sighting the Spaniards, might give the earliest possible notice of the movement of the enemy by making immediately for St. John or Cape Race and telegraphing its information to the United States.

The Terror Still at St. Pierre.

St. Pierre, Martinique, May 24.—There has been no change in the situation here. The hospitalship Alcante lies at her new moorings, and the departure of the torpedo-boat destroyer Terror is still deferred. Reports continue current that Admiral Cervera's squadron will return here to coal, but they are without confirmation.

Captain Deschamps Decorated.

Madrid, May 24.—The grand cordon of naval merit has been conferred upon Captain Deschamps of the Spanish steamer Montezuma, which recently arrived at Coruna from Cienfuegos. The queen regent personally presented the captain with the insignia.

NEGRO LYNCHED.

He Threw a Boy Tramp From a Moving Train.

Paducah, Ky., May 24.—Joe Mitchell, colored, an Illinois Central brakeman, who lives here, was hanged by a mob at Rives, Mo. Mitchell shoved a white boy tramp off a moving train at Rives, and the boy fell on the track, having his legs cut off at the knees. He lived long enough to tell that Mitchell was his assailant. The murderer was arrested, and while being held at the depot to be taken to jail at Union City, Tenn., a crowd gathered, and, securing him, hanged him in 10 minutes.

Prominent Covington Citizen Suicides by Taking Carbolic Acid—Suit to Settle Responsibility of Holdeman's Bondsman—Wants Damages Because Her Husband Enlisted in the Army.

Indianapolis, May 24.—A traveling photographer named Fred Spoor, who formerly lived in Syracuse and Louisville, went to a brothel in this city last night and inquired for Rosa Stout. On being shown to the parlor where the woman was alone he fired five shots at her, one of which took effect and proved fatal. The dying woman said the man was her husband. Spoor afterward went to Military park and shot himself through the heart.

DISFIGURED FOR LIFE.

Unknown Woman Throws Sulphuric Acid on Dr. Aimee Haskinson's Face.

Indianapolis, May 24.—A woman giving the name of Wilkinson last night called on Dr. Aimee Haskinson for consultation. The doctor admitted her to the house. She had no more than closed the door when the stranger threw a jar of sulphuric acid in her face. The cause of the dastardly deed is a mystery. It is said at the navy department that it will be at least five days before the Monterey can be started on her long journey from San Francisco, for Manila, the delay being on account of the preparations that must be made for the very exceptional service required of the vessel.

MANILA EXPEDITION. Preparation for the First One Almost Complete. San Francisco, May 24.—The preparations for the first expedition to Manila are almost complete. The first expedition will be divided as follows: The City of Peking, the first California volunteers, composed of 49 officers and 953 enlisted men, 10 officers and 71 sailors of the navy, making a total of 59 officers and 1,044 men. The City of Sydney, 13 officers and 318 enlisted men of the Oregon volunteers; 9 officers and 300 men of the first companies of the Fourteenth United States infantry, one officer and 50 men of the California heavy artillery and Dr. H. E. McVain, ranking medical officer, making a total of 24 officers and 670 men. The Australia, the headquarters, staff and band and two battalions of Oregon volunteers, comprising 37 officers and 676 men. The troops assigned to depart on the Australia and the City of Sydney have been ordered to report at the docks of their respective vessels today. The organization of the second expedition to the Philippines will not be determined until after the arrival of General Wesley Merritt, who is in command of the whole expedition and who will reach this city at the end of the week. The steamer Zelandia is due to arrive here from Honolulu today. The work of unloading her cargo will be rushed and the vessel will probably be turned over to the government Thursday night and the work of transforming her into a troop ship will commence immediately. The steamer China is expected to arrive from the Orient on Saturday. She will be ready for use as a transport by the end of the following week. About eight more large steamers will be required to transport the necessary soldiers to Manila.

Difficulty in Securing Transports. Washington, May 24.—Much comment and some criticism has been caused by the delay in forwarding troops to the Philippine islands to support Admiral Dewey. Both the comment and the criticism had their origin in the desire of the people that the fruits of Dewey's brilliant victory at Manila should not be endangered by any lack of assistance from either the navy or war departments. Troops which had been sent to Manila before this had it been possible to secure transportation on the Pacific coast. The utmost diff-

culty is being experienced in obtaining transports.

Castile's Statements Denied. New York, May 24.—The statements attributed to Senor Leon y Castillo, cable from Paris and published here, to the effect that negotiations were pending between the Spanish ambassador at Paris and Senor Botances, the representatives of the Cuban Republic government for the purpose of submission of Cuban insurgents is strenuously denied at the offices of the Cuban junta in this city.

Clearances Will Not Be Granted. Washington, May 24.—Secretary Gage has issued an order to custom officers notifying them that the port of Manila, Philippine islands is blockaded by the United States fleet under Admiral Dewey and therefore clearance will not be granted to merchant vessels for that port.

Buying Horses For Cavalry. Lexington, Ky., May 24.—For the cavalry, horses by the hundreds are being purchased in Kentucky and transported to Chattanooga and Tampa. Two parties of buyers, headed by Captains Aeshire and Carson, have been in Central Kentucky for a week past, and their purchases represent about 500 head of geldings.

General Merritt and Staff. Chicago, May 24.—General Merritt left for the Pacific coast last night on a special car attached to the Omaha train of the Chicago and Northwestern railroad. He started refused to be interviewed and the members of his staff maintained the same reticence.

Senator Foraker's Father. Hillsboro, O., May 24.—Henry S. Foraker, father of Senator J. B. Foraker of Ohio, died here yesterday aged 88.

Railroad Men Slashed. Bellefontaine, O., May 24.—C. H. Fetter, W. D. Quigley and Floyd Crandall, all firemen on the Indianapolis division of the Big Four, were badly cut by three colored men. The negroes who used their razors with such telling effect escaped. The railroad men had attempted to shield a one-armed man from the ruffians when assaulted.

Went to Sleep on the Track. Shelbyville, Ky., May 24.—Richard Bohannon, a well known farmer, was run down and killed by a Southern railway train near Hemp Ridge station, eight miles east of this place. It is presumed he went to sleep on the track.

Port de Piax Dispatches Report It Off North Cuba.

IMPORTANT CUBAN NEWS

Believed to Have Been Received at Madrid.

Vatican Said to Have Received Word From Washington Regarding Sympathy With Spain—Another Cabinet Crisis Believed to Be Near—Minister of Finance Refuses to Adopt Income Tax—Troops Leaving Cadiz.

Port au Prince, Hayti, May 24.—The following dispatch has been received from Port de Paix, dated Saturday last, and telegraphic communication having been interrupted up to last evening: "A furious cannonading was heard on the 19th (Thursday) last in the direction of the north of Cuba. Today (Saturday), the cannonading continues in a very lively fashion."

[Port de Paix is in the northwestern part of Hayti and the firing referred to may have been from any part of the eastern extremity of Cuba. As the Spaniards claim Guantanamo was recently bombarded by American warships, the sound of firing may have come from that direction.]

IMPORTANT NEWS FROM CUBA.

But the Government Fails to Make It Public.

Madrid, May 24.—The belief is prevalent in all circles and in all sections of the press that the government is in possession of important news from Cuba. Its character has not been made public. The report that Great Britain had sent a note to Spain asking an explanation of the concentration of troops in the neighborhood of Gibraltar is officially denied.

GOT A POINTER.

Report That the Vatican Received Notice From Washington.

London, May 24.—The Rome correspondent of The Chronicle says he learns that the vatican's declaration of neutrality was due to a notification from Washington that no manifestations of sympathy with Spain would be tolerated.

A dispatch to The Daily Chronicle from Barcelona says: "A steamer took 1,000 soldiers from Cadiz Saturday for the Canaries or the Philippines, and there are two transatlantic liners now in port here."

The Daily Chronicle commenting on a despatch from its correspondent at Kingston, Jamaica, who says that England has thrown 18 months' supplies into Jamaica, where all the officers have had their leave withdrawn, asks if England is going to take a hand in the Hispano-American war and couples its correspondent's report with the rumor current in Liverpool yesterday that France is trying to buy the Canaries for 6,000,000 pounds (\$30,000,000).

CRUISER FOR PATROL DUTY.

British Officer Urges the Necessity of One for the Canaries and the Philippines.

St. John, N. F., May 24.—An officer from one of the British warships on the west coast of this island arrived here last night to consult with the governor, Sir Herbert Murray, as to the contingency of the arrival of the Spanish fleet in these waters to obtain coal. The officer desires that his name should not be mentioned, but he urges Sir Herbert Murray to advise the American government to send one of its fastest cruisers to patrol the Grand Banks for a week or more, that the cruiser, on sighting the Spaniards, might give the earliest possible notice of the movement of the enemy by making immediately for St. John or Cape Race and telegraphing his information to the United States.

The Terror Still at St. Pierre.

If there should be a second call for troops and W. J. Bryan's regiment should be among those who go to the front, a "swing around the circle" would be the delight of "Colonel Bryan." ANIMALS UNDERGROUND.

Burrowing as It Is Performed by Various Species of Mammals.

Ventilation, or rather the want of it, must be a difficulty in the underground life of almost all mammals. The rabbit and the rat secure a current of air by forming a bolt hole in connection with their system of passages, but the fox, the badger and many of the field voles and mice seem indifferent to any such precaution. There is no doubt that whatever gave the first impulse to burrow, many animals look upon this, to us most unpleasant exertion, as a form of actual amusement. It also confers a right of property.

Prairie dogs constantly set to work to dig holes merely for the love of the thing. If they cannot have a suitable place to exercise their talent in, they will gnaw into boxes or chests of drawers, and there burrow, to the great detriment of the clothes therein contained. In an inclosed prairie dog "town" they have been known to mine until the superincumbent earth collapsed and buried the ground number. A young prairie dog, let loose in a small, gravel floored house, instantly dug a hole large enough to sit in, turned round in it and bit the first person who attempted to touch him. Property gave him courage, for before he had been as meek as a mouse.

It is noticeable that the two weakest and least numerous of our mice, the dormouse and the harvest mouse, do not burrow, but make nests, and that these do not multiply or maintain their numbers, like the burrowing mice and voles. But the fact that there are members of very closely allied species, some of which do burrow, while others do not, seems to indicate that the habit is an acquired one.

In this connection it is worth noting that many animals which do not burrow at other times form burrows in which to conceal and protect their young, or, if they do burrow, make a different kind of a more elaborate character. Among these nursery burrows are those of the dog, the fox and sand martin, the kingfisher and the sheldrake. Foxhound litters never do so well as when the mother is allowed to make a burrow on the sunny side of a straw stack. In time she will work this five or six feet into the stack and keep the puppies at the far end, while she lies in the entrance. Vixens either dig or appropriate a clean burrow for their cubs, which is a natural habit, or, at any rate, one acquired previously to the use of earth by adult foxes.—London Spectator.

HAUNTED BY A NUMBER.

Figures Scribbled by a Schoolboy Finally Brought Fortune.

"My brother William, who died a few years ago," said Colonel Andrew Freeman the other night, "from his boyhood days had a curious habit of scribbling on every piece of blank paper he picked up.

"When he was first able to form figures with a pen or pencil, he would trace the meaningless number '15,174' on everything that had a blank space of sufficient size. On the whitewashed walls of the little old red schoolhouse down in my home county in the Peninsular that boy wrote '15,174' ten thousand times or more.

"On the fly leaf of his textbooks, on the margins of the newspapers my father was a subscriber for, on the envelopes and on the unused bits of papers in all of the letters that came to our house he traced those figures in every idle moment without being able to tell why he did so. My father gave the lad some pretty severe thrashings and countless reprimands for indulging in the senseless habit, but Will never stopped it for a day.

"When I was 27 and Will was 22, I told him one day that I was going to play the numbers here was so devoted to in the Louisiana lottery and if I drew anything I would divide up with him. I had been throwing away a dollar in the gift enterprise for five or six years and had never drawn a cent. I didn't get the number I wanted that month, but the next month I got two tenth tickets, number 15,174, and I struck the \$10,000 capital prize. Will got one-half of the cash, and till the day of his death, eight years ago, never quit talking about the luck his hobby brought him. It was the most remarkable occurrence in my life and the most notable occurrence in the history of our family."—Louisville Post.

The Price of Liberty.

"You mean to say, uncle, that you bought your liberty?" the congressman asked in surprise, thinking to humor the old man.

"It's a fac', cap'n, en twenty-seven hundred wuz de price."

"I thought eternal vigilance was the price of liberty, uncle?"

Scratching his head for an understanding, the ex-slave replied doubtfully, "Waal, cap'n, dat mout be de case wid de white folks, but de pooh nigger has ter pay cash."—Cincinnati Commercial Tribune.

The prohibitionists of the state are to meet at Indianapolis tomorrow to nominate a state ticket.

The need for the completion of the Nicaragua canal has never been more keenly felt than since the beginning of hostilities with Spain.

The republicans of the Eighth, Ninth and Eleventh districts meet today to nominate congressional candidates. The indications are that there will be a sharp contest in the Eighth district. In the Ninth district indications point to the renomination of Congressman Landis, and the renomination of Major Geo. W. Steele in the Eleventh is generally conceded.

If there should be a second call for troops and W. J. Bryan's regiment should be among those who go to the front, a "swing around the circle" would be the delight of "Colonel Bryan." He would be making speeches at every stop, but from force of habit might demand fifty or a hundred dollars in advance from his listeners at every stopping place.

ANIMALS UNDERGROUND.

Burrowing as It Is Performed by Various Species of Mammals.

Ventilation, or rather the want of it, must be a difficulty in the underground life of almost all mammals. The rabbit and the rat secure a current of air by forming a bolt hole in connection with their system of passages, but the fox, the badger and many of the field voles, and mice seem indifferent to any such precaution. There is no doubt that whatever gave the first impulse to burrow, many animals look upon this, to us most unpleasant exertion, as a form of actual amusement. It also confers a right of property.

Prairie dogs constantly set to work to dig holes merely for the love of the thing. If they cannot have a suitable place to exercise their talent in, they will gnaw into boxes or chests of drawers, and there burrow, to the great detriment of the clothes therein contained. In an inclosed prairie dog "town" they have been known to mine until the superincumbent earth collapsed and buried the greater number. A young prairie dog, let loose in a small, gravel floored house, instantly dug a hole large enough to sit in, turned round in it and bit the first person who attempted to touch him. Property gave him courage, for before he had been as meek as a mouse. It is noticeable that the two weakest and least numerous of our mice, the dormouse and the harvest mouse, do not burrow, but make nests, and that these do not multiply or maintain their numbers, like the burrowing mice and voles. But the fact that there are members of very closely allied species, some of which do burrow, while others do not, seems to indicate that the habit is an acquired one.

In this connection it is worth noting that many animals which do not burrow at other times form burrows in which to conceal and protect their young, or, if they do burrow, make a different kind of a more elaborate character. Among these nursery burrows are those of the dog, the fox and sand-martin, the kingfisher and the sheldrake. Fox and marten never do so well as when the mother is allowed to make a burrow on the sunny side of a straw stack. In time she will work the five or six feet into the stack and keep the puppies at the far end, while she lies in the entrance. Vixens either dig or appropriate a clean burrow for their cubs, which is a natural habit, or, at any rate, one acquired previously to the use of earth by adult foxes.—London Spectator.

"I exchanged a secondhand war club for a bushel of those things when I was in London last summer, and there was not one of them that went for more than a week."—Pearson's Weekly.

Deafness Cannot be Cured.

By local applications as they cannot reach the diseased portion of the ear. There is only one way to cure deafness, and that is by constitutional remedier. Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube is inflamed you have a rumbling sound or imperfect hearing and when it is entirely closed, deafness is the result and unless the inflammation can be taken out and this tube restored to its normal condition, hearing will be destroyed forever; nine cases out of ten are caused by Catarrh, which is nothing but an inflamed condition of the mucous surfaces.

We will give One Hundred Dollars for any case of Deafness (caused by catarrh) that cannot be cured by Hall's Catarrh Cure. Send for circulars free.

Chronic Dyspepsia Cured.

AFTER suffering for nearly thirty years from dyspepsia, Mrs. E. E. Dugdale, wife of a prominent business man of Warsaw, N. Y., writes: "For 25 years, I was a constant sufferer from dyspepsia and a weak stomach. The lightest food produced distress, causing severe pain and the formation of gas. No matter how careful of my diet I suffered agonizing pain after eating. I was treated by many physicians and tried numerous remedies without permanent help. Two years ago I began taking Dr. Miles' Nervine and Liver Pills and Nerve. Within a week I commenced improving, and persisting in the treatment I was soon able to eat what I liked, with no evil effects. I keep them at hand and a single dose dispels any ill symptoms."

TUESDAY, MAY 24, 1898.

CHAIRMAN Parks Martin has issued the official call for the democratic state convention June 22.

The prohibitionists of the state are to meet at Indianapolis tomorrow to nominate a state ticket.

The need for the completion of the Nicaragua canal has never been more keenly felt than since the beginning of hostilities with Spain.

The republicans of the Eighth, Ninth and Eleventh districts meet today to nominate congressional candidates. The indications are that there will be a sharp contest in the Eighth district. In the Ninth district indications point to the renomination of Congressman Landis, and the renomination of Major Geo. W. Steele in the Eleventh is generally conceded.

If there should be a second call for troops and W. J. Bryan's regiment should be among those who go to the front, a "swing around the circle" would be the delight of "Colonel Bryan." He would be making speeches at every stop, but from force of habit he might demand fifty or a hundred dollars in advance from his listeners at every stopping place.

ANIMALS UNDERGROUND.

Burrowing as It Is Performed by Various Species of Mammals.

Ventilation, or rather the want of it, must be a difficulty in the underground life of almost all mammals. The rabbit and the rat secure a current of air by forming a bolt hole in connection with their system of passages, but the fox, the badger and many of the field voles and mice seem indifferent to any such precaution. There is no doubt that whatever gave the first impulse to burrow, many animals look upon this, to us most unpleasant exertion, as a form of actual amusement. It also confers a right of property.

Prairie dogs constantly set to work to dig holes merely for the love of the thing. If they cannot find a suitable place to exercise their talent in, they will gnaw into boxes or chests of drawers, and there burrow, to the great detriment of the clothes therein contained. In an inclosed prairie dog "town" they have been known to mine until the superincumbent earth collapsed and buried the greater number. A young prairie dog, let loose in a small, gravel floored house, instantly dug a hole large enough to sit in, turned round in it and bit the first person who attempted to touch him. Property gave him courage, for before he had been as meek as a mouse.

It is noticeable that the two weakest and least numerous of our mice, the dormouse and the harvest mouse, do not burrow, but make nests, and that these do not multiply or maintain their numbers, like the burrowing mice and voles. But the fact that there are members of very closely allied species, some of which do burrow, while others do not, seems to indicate that the habit is an acquired one.

In this connection it is worth noting that many animals which do not burrow at other times form burrows in which to conceal and protect their young, or, if they do burrow, make a different kind of a more elaborate character. Among these nursery burrows are those of the dog, the fox and sand martin, the kingfisher and the sheldrake. Foxhound litters never do so well as when the mother is allowed to make a burrow on the sunny side of a straw stack. In time she will work this five or six feet into the stack and keep the puppies at the far end, while she lies in the entrance. Vixens either dig or appropriate a clean burrow for their cubs, which is a natural habit, or, at any rate, one acquired previously to the use of earth by adult foxes.—London Spectator.

He Had Traveled.

"Now," said the intrepid explorer after he had shown the guileless native the inside workings of the brass watch and had noted his naive wonder at the mysteries of the mechanism, "I will let you have one of these for two tusks. Then you can be the envy of the tribe." The native gentleman yawned. Then he said:

"I exchanged a secondhand war club for a bushel of those things when I was in London last summer, and there was not one of them that went for more than a week."—Pearson's Weekly.

Deafness Cannot be Cured. By local applications as they cannot reach the diseased portion of the ear. There is only one way to cure deafness, and that is by constitutional remedies. Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube is inflamed you have a rumbling sound or imperfect hearing and when it is entirely closed, deafness is the result and unless the inflammation can be taken out and this tube restored to its normal condition, hearing will be destroyed forever; nine cases out of ten are caused by Catarrh, which is nothing but an inflamed condition of the mucous surfaces.

We will give One Hundred Dollars for any case of Deafness (caused by catarrh) that cannot be cured by Hall's Catarrh Cure. Send for circulars free.
